

Mike Booth

Implantology and Prosthodontics

Mike graduated from Manchester University in 1973, and immediately returned to start practising as an associate dentist in his home town of Garstang. During the period 1976-2009, Mike developed and owned totally private practices in Lytham, Garstang and Grange-over-Sands, before joining Phil Broughton at The Mall.

Mike has undertaken post-graduate training and gained extensive experience, in the areas of implantology, prosthodontics and orthodontics, and has an all consuming interest in these disciplines. His study has, and does, take him regularly to “Centres of Excellence” in the UK, USA, Germany, Sweden and Italy. He has a special interest in mentoring recently qualified dentists wishing to gain experience in the surgical aspects of implantology, and gains immense satisfaction from seeing dentists gain confidence in starting off in this challenging field.

During the period 1982-1990, Mike acted as Consultant in Dental Materials for 3M Espe at their facility near Munich, where invaluable experience was gained working with an international dental community.

Always wishing to “spread the word”, Mike has lectured extensively to post-graduate groups on Private Practice Development, Implantology, Multi-disciplinary Treatment Planning, and Patient Management.

Services offered:

- Implant placement and restoration
- Treatment of complex restorative cases
- Denture stabilisation
- Treatment of the worn dentition
- Treatment of problematic full or partial denture patients
- Precision attachment solutions
- Orthodontic treatment: orthopaedic orthodontics, removable and fixed therapies and Invisalign.
- Mike is a member of SAAD and is happy to provide treatment with IV sedation if appropriate.
